```python
L,R=map(int, input().split())
odds=[]
for i in range(L,R+1):
    if i%2==1:
        odds.append(i)
print(*odds)
```

```python
N = int(input())
if N%5==0 or N%6==0:
    print("YES")
else:
    print("NO")
```

```python
N,K = map(int, input().split())
lst=list(map(int, input().split()))
if K in lst:
    print(1)
else:
    print(-1)
```
